

Template of Report from the National MDG Dialogue

Each working group must produce a 5-7 page analysis in single space Calibri 11, and formatted as follows:

Section One: Scope (1-2 paras)

This section should outline the scope of analysis (i.e. the MDG target area concerned plus other related national priorities to be included).

Section Two: Trends (1 page)

This section should trace the long and shorter term trends and zero in on the areas in which Bangladesh is lagging. This section should thus seek to spell out key bottlenecks constraining progress on specific MDG targets and the implication of the impact of the economic crisis and climate change on MDG progress.

Section Three: Analysis of areas where more effort is required to reach the targets (3 pages)

Description of evidence-based findings with references (annexed if needed). Where applicable, this section should include good practices examples that accelerate MDG progress and their replicability

Section Four: UN response (annex)

Identification of priority areas where UN agencies need to place greater emphasis (to be used to inform the UNDAF formulation)

Annexes

- reference documents
- list of participating partners in the national dialogue
- tables and charts to substantiate the analysis as required.
